AMERICAN FISHERIES SOCIETY

Stanley A. Moberly, *President*

Carl R. Sullivan, *Executive Director* Robert L. Kendall, *Managing Editor*

The American Fisheries Society was organized in 1870. Its objectives are conservation, development, and wise use of recreational and commercial fisheries; promotion of all branches of fisheries science and practice; and exchange and dissemination of knowledge about fish, fisheries, and related subjects.

UNITED STATES DEPARTMENT OF THE INTERIOR

Donald P. Hodel, *Secretary*

William P. Horn, *Assistant Secretary for Fish, Wildlife, and Parks*

Fish and Wildlife Service, Frank Dunkle, *Director*

As the Nation's principal conservation agency, the Department of the Interior has responsibility for most of our nationally owned public lands and natural resources. This includes fostering the wisest use of our land and water resources, protecting our fish and wildlife, preserving the environment and cultural values of our national parks and historical places, and providing for the enjoyment of life through outdoor recreation. The Department assesses our energy and mineral resources and works to assure that their development is in the best interests of all our people. The Department also has a major responsibility for American Indian reservation communities and for people who live in island territories under U.S. administration.
